

Flanged chemical seals series D820-824-825

Chemical seals with built-in flange

Flange facing and diaphragm of the same material
(D824, D825)

Fluid temperature from -60 to +400°C

Designed for process, chemical, petrochemical, petroleum, power, waste treatment industries, etc.

Used when the process monitored requires an interface protecting the measuring device from the fluid to be measured (viscosity, corrosion, contamination, temperature, etc.).

D820 DN > 25 mm

D820 DN ≤ 25 mm
