

Viscosity Controller MP2500 (CE)

Introduction

Front View of MP2500

Two MP2500 and one Blank Filter mounted in standard 3U subrack

MP2500 on Wall Mount Kit and a Wall Mount Kit next to it

The MP2500 Viscosity Controller offers an entirely new standard in simplicity:

- Simple five button operation.
- Suitable for solvent and water based liquids.
- Automatically adds solvent to control viscosity.
- Manual solvent additions are made by pressing a single button.
- Large seven segment digital displays.
- Programmable with different solvent control algorithms.
- Supplied with detachable electrical pug for easy hookup.
- Supplied with an integral metal enclosure.
- 3U x 21HP DIN size (fits standard 3U subrack).
- Suitable for panel mounting, see drawing A-7272-R.
- Single detachable electrical plug for simple hookup.
- Operates on 24vdc supply.
- Optional wall mounting kit available.

The single channel MP2500 Viscosity Controller is compatible with all Norcross Measuring Elements. The compact size and simplicity of the MP2500 enable simple multiple unit installation.
